

## Opbevaring og adgangsforhold – samlerens udfordring.

**Det første depot på loftet.** Radioerne stod oven på hinanden i 3 rækker. På grund af den skrå væg kunne der stå 1 inderst, 2 i midten og 3 yderst. Kun 50% af samlingen kunne ses. Det var meget besværligt at finde og udtage en radio. Lysforholdene var ikke gode.

**Det næste sted var også et loft.** Der var indsat hylder så radioerne ikke ridsede hinanden. Stadig kunne man kun se 50%, men det var lettere at finde og udtage en radio. Lysforholdene var bedre med lysstofrør og de fleste besøgende kunne stå oprejst.

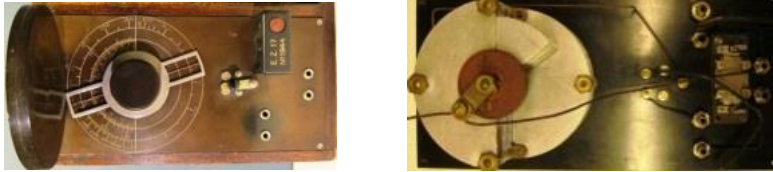

**Det nyeste sted er i et isoleret skur.** Der er tilpassede hylder og alle radioer kan ses. Lysforholdene er perfekt. Rummet er uden varme (2-20 grader). Fugtigheden reguleres til 54%. Forholdene er ideelle – endelig.
